Project Name

Create a chatbot in Python

Your Name : **jayachandran**

Email ID : 814621104022,trichyengg.ac.in

Overview

Creating a chatbot in Python involves several steps, and it's important to decide on the chatbot's purpose and functionality before starting. Here's a high-level overview of the process:

1 . Define the Purpose

2 . Choose a Framework or Library:

3 . Data Collection and Preprocessing:

3 . Natural Language Processing (NLP):

4 . Training (if applicable):

5 . User Interface:

6 . Integration with External Services (if needed):

Program
